

### **Emergency Service 24/7**

Our emergency unit has staff 24 hours a day, 7 days a week.

We have ambulances equipped with Intensive Therapy as well as a crew of certified and highly qualified paramedics.

### **Emergency App**

In case of emergency, press the red button and the app will locate you thanks to GPS technology and activate ambulance and paramedics for your help.

Available for iOS and Android.

### **Diagnostic Laboratory**

Our state-of-the-art center provides a wide variety of clinical laboratory analysis services for our physicians and patients.

- Diagnostic Tests
- Detection Tests
- Radiology

### **External Consultation**

Our Physicians provide outpatient medical care Monday through Friday from 9am to 6pm and Saturdays from 9am to 2pm.

For patients who want medical care in the comfort of their home, or for those who move represents a major complication, we offer the service of medical consultation at home. With which one of our doctors will provide the service you require with the greatest privacy and comfort you deserve. We bring the quality and warmth of our service to the door of your home.

### **Specialty Consultation**

By appointment, please contact us [pmhappointment@puntamitahospital.com](mailto:pmhappointment@puntamitahospital.com) or 01 (329) 688 0059

### **Fertility Clinic**

In our reproductive and gynecological health center we have the avant-garde experience and equipment. Punta Mita Hospital has an exclusive IVF laboratory, where Dr. Najmabadi, Dr. Rivas and specialized staff constantly try to incorporate new and improved laboratory methods and procedures to help patients achieve a pregnancy and have healthy babies. The following reproductive technologies are available in our Clinic.

- Fertility Studies
- In vitro fertilization (IVF)
- Intrauterine insemination (IUI)
- Assisted Incubation (AH)
- Intracytoplasmic sperm injection (ICSI)

- Transfer / freezing of blastocysts
- Freezing / vitrification of sperm, embryos and ovules
- Preimplantation genetic diagnosis (PGD)
- Family balance (sex selection)
- Egg donation

We are also pleased to announce that Punta Mita Hospital is the only center in Mexico that has the Vitrolife Embryoscope technology!

State-of-the-art technology now available in PMH

Recent technological advances have brought regenerative treatments for hair and joints to Punta Mita Hospital.

### **First Aid, CPR and AED Management courses**

At Punta Mita Hospital we are committed to the health and well-being of people, and we know that in case of emergencies the care and attention provided in the first minutes can make a difference in saving lives. Therefore, we have organized our FIRST AUXILIUM, CPR AND DEFIBRILLATOR MANAGEMENT (DAE) course for business administrators, operational personnel and the community in general.

We offer also Course of Pediatric First Aid - training designed for people who work as babysitters or who wish to prepare for emergency actions that may occur with minors (children) on a day-to-day basis.
