Tim B Photography

5 reasons a Google Virtual Tour is good for your business.

1. You get **discovered** on your Google listing and will reach more customers online resulting in increased visits/reservations through Google.
2. **Attract** more customers by engaging them with the tour. Your potential guests get to see the ambiance and environment before they arrive. People are more likely to visit your place if they can see 3D photos and virtually walk through the business.
3. It is an **Innovative** way to interact with your online audience along with being up to date with your competitors.
4. It's **affordable** and on Google for a lifetime with no fees, no maintenance, no renewals, etc. You pay one time for us to do the photo shoot and that is the final expense. A table of 4 a couple of times in one night will pay for the Google virtual tour.
5. It **organically boosts your search results** on Google with the more times people look at your Google listing and photos. You can also embed the tour to your website and social media so people are rerouted to the Google Virtual Tour on your Google business listing creating more hits.
